

THE MARS SCREEN.

MULTI-ACTIVITY RESOURCE STATION.

ANY GYM. ANY ABILITY. ANYWHERE.

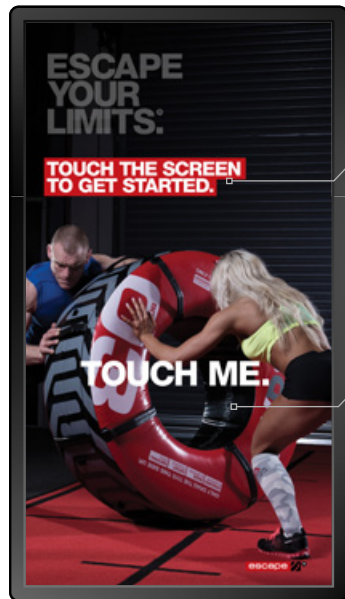

REVOLUTIONIZE TRAINING.

Getting your gym experience right can create the value that sets your business apart from the competition. This can be particularly challenging for hotels and multi-family housing, with few or no PTs – that's because the experience is not just about the fitness equipment.

As the fitness industry continues to evolve, customers and clients expect information to be immediately accessible, keeping them educated and inspired throughout a workout – so we've put it at their fingertips.

The MARS (Multi-Activity Resource Station) screen bridges the gap between education and exercise – helping you attract new customers and retain those you already have.

SCREEN MOUNTING FIT FOR ANY SPACE.
The MARS screen can be easily mounted in three ways to suit the set-up of any gym layout.

TAP AND TRAIN.
A responsive touchscreen and simple navigation means users can easily find the workouts they're looking for at any time.

BOOST SAFETY AND EXPERIENCE.

ENGAGE GYM-GOERS IN ANY FITNESS SPACE.

Gyms need to stay up to date to attract customers. Today, people are often more comfortable with a screen than a person to develop their confidence. Even some of the most experienced gym-goers need support to use the latest functional training tools.

UNBEATABLE ROI.

With cost-effective content and application, you don't even need any special equipment to include MARS in your facility – just a plug socket and a wired internet connection.

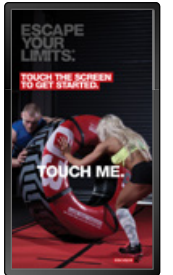

Each time a new Escape product is launched, your MARS content will be updated, keeping your fitness space on-trend and leading the way in education, information and customer experience.

CHOOSE FROM THREE OPTIONS.

01 SOLO MARS SCREEN.

Create a focal point in any fitness space with a stand-alone MARS screen, attached to a wall using a bracket. See above for more details.

02 MARS RACK PACK.

A complete package, the MARS RACK PACK consists of two RACK5 units, fully-stocked with Escape equipment and the MARS screen as the centerpiece.

03 MARS ON A FRAME.

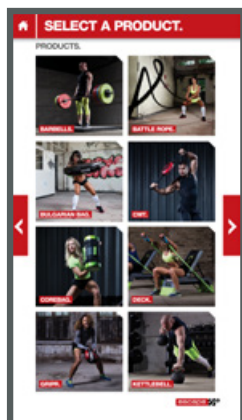

Easily visible and accessible, a MARS screen can be mounted on any Octagon frame leg at around 1.5m from the floor with the addition of a bracket.

ONE SCREEN – YEARS OF EXPERIENCE.

Installing a MARS screen in your fitness space brings years of experience to any facility. Gym users will have the best exercises and movements with exciting training tools, any time of the day. They'll be able to work out, comfortable in the knowledge that there's always a resource at their fingertips for discovering what's possible with Escape equipment. Monthly content updates means there's no better cost effective way to offer peace of mind for both users and operators, with the longevity of timeless content and workouts that really work.
